

Industrial Solutions

Take your paint and coating applications to the next level with our biodegradable Lattice® NTC biopolymer

ECS 2025 Product Presentation Abstract

Lattice® NTC microcrystalline cellulose is a great renewable alternative to non-renewable petrochemicals and has a lot to offer for a wide range of industrial applications, including water-based coatings and paints applications. Learn more about how Lattice® NTC excels as a rheology modifier, stabiliser and suspending agent. Following a short introduction on our strong legacy in cellulose-based additives, this presentation will provide you with scientific insights on Lattice® NTC, its applications, functionality, benefits and usage.

Presented by: Dr. Hui Shirley Yang, Senior Lead Applications Scientist, IFF Industrial Solutions
