

Pure Acrylic for Exterior Coatings: Formulation Versatility, Durability, and Dirt Pick-up Resistance

Thomas Bernhofer, Technical Service Manager Coatings Europe

Exterior masonry coatings play a crucial role in protecting buildings and structures from environmental elements. They act as a shield against harsh weather conditions, UV radiation, and moisture, preventing structural damage and extending the lifespan of the surfaces they cover. Key properties like durability and dirt pick-up resistance are essential for ensuring long-lasting performance. For formulators, versatility is vital in enhancing the product's functionality and the diverse requirements of their customers.

In this presentation we will introduce our all-new Pure Acrylic binder for low VOC Exterior masonry Coatings. The product offers excellent exterior durability and dirt pick-up resistance, allowing enhanced formulation versatility for a wide range of coatings.

Elevate your masonry coatings to new heights with an innovative polymer, designed to be the solution for high-quality finishes and durable protection.
