

**ALBERDINGK® AC 2006 VP – a new pure acrylic for ultra-versatile interior and exterior paints (Martina Wienke, Technical Marketing Coatings, [m.wienke@alberdingk-boley.de](mailto:m.wienke@alberdingk-boley.de))**

This presentation will focus on our new pure acrylic dispersion ALBERDINGK® AC 2006. This new acrylic combines superior mechanical properties with optimised water resistance and water vapour transmission. We will present comparative testing to outline the great colour stability and the excellent efflorescence as well as dirt pick up resistance. ALBERDINGK® AC 2006 VP can be used over a variety of substrates like EIFS, bricks but also wood and plastics making it an ideal choice for house paints.
