Title: Addibond™ 106 - Ecolabel Adhesion Promoter for Waterborne Paints

Speaker: Ms Véronique DIVRY, Syensqo

Addibond™ 106 is an innovative adhesion promoter designed for waterborne coatings formulations, specifically tailored to meet the needs of the Direct to Metal (DTM) market. It enhances early adhesion on metal surfaces, particularly galvanized steel. User-friendly and easy to incorporate at any stage of the formulation, it requires only a low dosage. Compatible with various systems such as Acrylic, PUD, and Epoxy, Addibond™ 106 offers a strong sustainability profile, improving durability while minimizing environmental impact. It is Ecolabel compliant, featuring very low VOC and SVOC levels. Recommended for architectural and industrial coatings, it meets the C1/C2 corrosion resistance class.
