

# AGRANA Specialty Starches in Technical Applications – Renewable by Nature

By 2025, AGRANA will be the biggest producer of special starch ethers for dry-mix formulations worldwide.

AMITROLIT starches are considered the benchmark in the market and are well known for improving workability and efficiency, leading to success in your projects and satisfied customers. And, in challenging times like today, the new AMITROPRO grades provide improved performance at a competitive price level and reduced carbon footprint.

But not only customers in the construction industry appreciate products by AGRANA. Have you already heard about:

- AMITROGLUE – our unique starches for adhesives with stable viscosity and high solubility
- COLLABOND – our paper bag glues for paper bags all around the world.
- AGENACOMP and AMITROPLAST – our biodegradable bioplastics
- AMITROL, AMITROCOLL, COLLAMYL – our starches for paper, corrugating, laminating, coating and ready-mix

**AGRANA. Renewable by nature. Sustainable for you.**
