

## **Perstorp's newly expanded Alkoxylate platform for versatile additive building blocks and TMPTA alternatives**

### Abstract

Perstorp has a rich history of supplying polyol alkoxyates for radiation-curing resins and polyurethane applications. Now, as part of the PCG family, we are expanding our portfolio to include precursors for coating additives, such as specialty PEGs, PPGs, PAGs, and Allyl polyethers. With strong backward integration and a focus on sustainability, we aim to deliver high-quality, innovative solutions that meet evolving market demands. By collaborating closely with our customers, we strive to develop advanced alkoxylate building blocks that drives performance and regulatory compliance for resins and additives. Unlock the potential of cutting-edge alkoxylate building blocks with Perstorp.
