

Title of the lecture:

Wanhua New Development for Printing Ink

Subject classification:

Printing ink raw materials

Presenter: Daniel Hao

Brief introduction:

Based on the ink market demand and the future trend of environmental protection development, Wanhua has developed a series of Innovative water-based ink resins. The products adopt unique formula and structural design which have high gloss, excellent color strength, and excellent workability. They can be applied to paper packaging and plastic packaging printing ink, like paper boxes/bag, cigarette packaging , plastic packaging bag, and more
