

**The antimicrobial coating technology that really works.**

Ofer Shoham CEO & Co funder Bio-fence

Bio-fence is solving one of the most challenging problems in Food Hygiene  
Creating a pathogen-free environment and preventing food contamination  
Bio-fence patented, and innovative additive can convert any paint or coating to a  
powerful antimicrobial

Floors treated with coatings containing Bio-fence additive demonstrated the ability  
to stabilize disinfectants over time and thereby create an ultra-hygienic environment  
Numerous projects demonstrated the ability of Bio-fence technology to eliminate any  
trace of Listeria and Salmonella and maintain ultra-hygienic conditions in  
sensitive food production sites together with a substantial operational savings and  
rapid ROI
