

Gabriele Costa - Global Product Manager Bio Resins

## Bio Based & Sustainability

Maximize the performance with Waterborne Biobased Resins for Packaging, Architectural and Wood Coatings. Reducing the climate change impact without compromise.

We will present our latest innovation in WB biobased solutions designed for Packaging, Architectural and Wood Coatings. By mimesis of nature our biobased technologies merge performance and sustainability. We will illustrate how biobased attributes boost performance and reduce the climate change impact providing water and oil barriers, multiple haptic feelings and appearances, mechanical hardness and flexibility, endurance and chemical resistance on all surfaces.
