Title: LIPATON SB 40Y45: Low VOC binder for mortars in need for outstanding workability properties

Speaker: Charles Bobichon

Short Abstract:

Our latest low VOC binder, LIPATON SB 40Y45, is a unique dispersion designed to increase the versatility of mortars. This carboxylated styrene butadiene binder provides improved rheology and workability, including stability under challenging conditions, such as high temperatures. In our presentation, we will provide an overview of LIPATON SB 40Y45's performances and how it can benefit your projects.
