

LOW MIGRATION - NEW PHOTOCURABLE PRODUCT DEVELOPMENTS: SARTOMER® UV RESINS AND PHOTOINITIATORS

Kévin DEMOULIN

Technical Service & Development Manager - EMEA
Sartomer® Specialty Resins and Additives

In order to bring new solutions answering the challenging indirect food contact application field, Arkema has pioneered through low migration approach with photocurable products specifically designed for the formulation of UV/LED curable inks and coatings, based on core pillars linked to raw material selection, differentiating product innovation, manufacturing process monitoring and superior quality control. The presentation will highlight the Sartomer® Low Migration (UV/LED resins and additives) range & latest developments.
