New RHEOBYK® family of solid non-dusting and biocide-free rheology additives

Find out more about our new family of solid associative thickener. RHEOBYK 7650, RHEOBYK-7670 and RHEOBYK-7690 are biocide and VOC free and therefore provide highest flexibility when formulating your paint. Three products based on HEUR technology will be introduced to cover the full range from low to high shear range. The special non-dusting flake delivery form gives tremendous advantage regarding handling and safety. Various rheology properties such as anti-settling or application behavior can be improved.
