

**Are you looking for tips and recommendations to develop new 2K WB PU wood coatings or to improve your existing formulations, then do not miss this presentation, which will introduce the Easaqua™ range of easy mixing, hydrophilic polyisocyanate crosslinkers from Vencorex.**

**2K WB PU coatings are often used in demanding applications, where the formulator needs to select the correct resin and also crosslinker to achieve the desired properties. One such demanding application for this type of coatings technology is the area of wood coatings.**

**In addition to giving an overview of the complete range of Easaqua™ hydrophilic polyisocyanate crosslinkers offered by Vencorex, this presentation will go on to highlight the benefits of using selected products from the Easaqua™ range, in the wood coatings application area.**
