

ROBUSTNESS, EFFICIENCY AND VERSATILITY FOR HIGH SOLIDS INDUSTRIAL COATINGS: CRAYVALLAC® REV

Yannick NABIL MOREAU

Global Technical Manager Industrial coatings
Arkema Rheology & Specialty Additives

Polyamide rheology additives provide excellent sag resistance and high performance in industrial paints.

The bio-based Crayvallac® REV enables to reduce customer constraints by improving robustness and efficiency. Furthermore, its versatility makes it a perfect universal tool to develop standard to very high solids coatings with less dependency on processing conditions and formulations types.
