

MORE SUSTAINABLE APPROACH & SOLUTIONS FOR THE COATINGS INDUSTRY

Hélène PERNOT

Sustainable offer manager - Coating Solutions

Climate change is among the greatest challenges the world is currently facing. Arkema has made a commitment to reduce its scope 1, scope 2 and scope 3 GHG emissions to be in line with the +1.5°C trajectory of the Paris Agreement.

As a designer of specialty materials (Arkema is supporting the transition to a more sustainable world for people and the planet), sustainability is at the heart of Arkema's innovation strategy, with three pillars on which to act: develop safer solutions, enable a lower carbon footprint along the value chain and promote circular economy to preserve resources.

Discover an exclusive view of Arkema's unique flagship innovations for our industry, to help our customers and partners meet their sustainability targets while enhancing product performance in highly-demanding applications.
