## **ISCC PLUS Certified Polyester and Acrylic Resins: The Importance of Certification Schemes in Sustainable Development**

Radmila Wollrab

In today's market environment, where companies are eager to promote and advertise their sustainable products, independent certification based on rigorous standards and providing clients with tangible evidence of traceability to a sustainable source are becoming more and more important. It is for this reason that we at Helios Resins decided to certify a certain number of our products according to the ISCC PLUS system.

The fundamentals of the mass balance approach and Helios Resins' sustainability strategy will be covered in the presentation as well.

### **Dr. Radmila Wollrab**

Project Manager  
Synthetic Resins
