

Abstract ECS 2023 Product Presentation

Dr. Susanne Ruppel

TEGO® DISPERS 780 W

Food contact compliance is a crucial factor to consider in the choice of additives, especially for packaging applications. A new novel high-performance waterborne polymeric dispersant with superior food compliance status & pigment shock resistance will be introduced.

This unique dispersant has universal applicability for all waterborne ink systems and for all kind of pigment binders. The key features: powerful viscosity reduction, improved color strength, strong pigment stabilization and high shock resistance will help to fulfill continuously growing requirements of ink formulators.
