

## **A New Breed of Sustainable Corrosion Inhibitor**

Intelli-ion® AX1 is an award-winning, patented technology that is designed to completely replace heavy metal and chromate inhibitors or co-blend with phosphate inhibitors. It provides the coatings market with a sustainable, cost-effect, high performance anti-corrosive additive.

The technology is unique in the industry and fights corrosion by delivering smart release inhibition. It is highly versatile and compatible with a broad spectrum of resin types, coating types and coatings manufacturing routes.

Join Dr Patrick Dodds to learn how Intelli-ion® works, see industry results, and how switching to Intelli-ion® AX1 can deliver benefits to your company on sustainability, product differentiation, performance and cost.
