

ECS Product Presentation Input

Thema des Fachvortrages:

Additives based on renewable raw materials for environmentally friendly paints

From its origins, MÜNZING is a sustainably operating company and leader in producing high-quality additives for eco-friendly paints.

Increased regulatory requirements and growing environmental awareness are driving forces in developing sustainable and environmentally friendly coatings. To meet this challenge together, MÜNZING is expanding its product portfolio and now offers selected high-performance additives with significantly increased renewable content. This includes bio-based defoamers, rheology modifiers, wetting agents and dispersants.
