

## **Radiation curing Materials from hubergroup Chemicals: be curious!**

### Abstract:

hubergroup Chemicals, one of the largest manufacturers in the chemicals sector, will showcase its state-of-the-art portfolio of resins at the European Coatings Show 2023. A particular focus is on radiation curing technologies for industrial coatings, mainly for the wood and furniture sector and polymer/LVT flooring. The presentation will cover high-performance and quality Polyester-, Epoxy and Urethane acrylates and will also feature new rosin-based UV-curable resins that come up with interesting properties and a high bio-renewable content. The chemicals specialist also offers custom manufacturing to quickly react to market needs by developing new products or adapting existing ones.
