

METOLAT® ETC 1 and METOLAT® ETC 2 - Easy-to-clean additives for solvent- and water-based systems

Thema: Lackrohstoffe

Abstrakt:

MÜNZING is introducing new members of the METOLAT®/ EDAPLAN® LA surface additive family. Based on siloxane technology, the new anti-graffiti additives METOLAT® ETC 1 and METOLAT® ETC 2 provide, besides the common surface properties like increased gloss, excellent leveling, and surface smoothness, uniquely easy-to-clean effects to your system. These new products offer superior compatibility and anti-graffiti properties, e.g., significantly reduced spray-paint adhesion and improved marker resistance.
